

Martin Lampard

Statement

- I have lived in Longparish with my family for over 25 years and recognise the huge value that a friendly village pub can bring to a community, especially when run for the benefit of the broader community as a not-for-profit business.
- I appreciate that it takes significant time and energy to get a 'born-again' business running sustainably, so I have enthusiastically supported the Plough since the beginning, volunteering practical help as well as helping on the finance working group. I am keen to see the pub flourish as a welcoming community pub and hub and would now like to offer support as a member of the committee.
- I work full time in software development and sales, and hope that my experience will help me contribute effectively to the Plough team.
