Statement

Personal Statement

I have lived at the border of the Longparish and Wherwell Parishes for 45 years and have been a Wherwell Parish Councillor for over 6 years. I have always taken an active role in local village activities and have been enormously impressed by the Plough regeneration project, especially the work done by the wonderful volunteers. I am delighted to be able to support this project.

How I can help?

I am a retired research scientist who has worked as an infectious disease consultant in national and international environments for many years. In retirement I have been involved in the management of several charities, including on the Trustee's Boards of Age UK Andover and the Winchester Science Centre. I, therefore, have a broad experience of project management in goal-orientated teams of various sizes.

Current role on LCPL Management Committee

I have recently been co-opted onto the Management Committee to take on the role of Compliance Officer. My research expertise is in the microbiological safety of food and the development of UK/EU food safety regulations. As a research manager I was responsible for the health and safety of staff and students. This experience will enable the Plough to meet its various compliance requirements.
